

Experience

Wealth Management Firm - *Freelance*

Remote | Nov, 2025

- Built AI-assisted reporting, lead operations, and workflow automation systems using Python, n8n, and Google Sheets, reducing reporting turnaround time by ~90%
- Conducted validation and structured analysis across multi-source datasets to improve reporting accuracy, operational visibility, and decision-making
- Engineered a cost-optimized data acquisition pipeline reducing third-party data dependency by ~25–30% while maintaining reliability
- Built dynamic reporting infrastructure supporting operational monitoring, risk reporting, and stakeholder analysis

BizOwl - *Founder's Office Intern*

Remote | Oct, 2025 – Nov, 2025

- Conducted structured analysis on customer and operational data to support business decision-making and process improvement initiatives
- Built performance tracking frameworks and reporting systems to improve visibility into operational metrics and execution outcomes
- Assisted in standardizing workflows and monitoring processes, improving consistency and reporting accuracy across functions
- Supported workflow optimization and structured experimentation initiatives to improve operational execution and campaign efficiency

Move Forward Technologies - *Founder's Office Intern*

Remote | Sep, 2025 – Oct, 2025

- Managed tracking and reporting across 30+ concurrent operational initiatives, improving visibility into delivery metrics and execution timelines
- Identified operational bottlenecks through structured root-cause analysis and KPI monitoring, reducing process cycle time by ~25%
- Developed standardized reporting templates and workflows to improve operational consistency and audit readiness
- Built dashboards and monitoring systems to track KPIs, issue resolution timelines, and operational performance

Project

AI Workflow & CRM Automation Infrastructure

- Engineered AI-assisted operational workflows using n8n, Google Sheets, APIs, and automation pipelines to streamline lead management and business execution
- Built end-to-end automated pipelines managing workflows from form submission → AI processing → follow-up actions → CRM/database updates
- Developed lead scoring, qualification, and routing systems using structured logic and AI-assisted enrichment workflows
- Automated follow-up sequences, status tracking, and operational reporting, significantly reducing manual coordination overhead
- Created centralized dashboards and workflow monitoring systems to improve execution visibility and pipeline tracking
- Integrated multi-step automation workflows connecting forms, Sheets, APIs, messaging systems, and operational databases

AI-Powered GTM & Outreach Automation System

- Built AI-assisted outbound infrastructure enabling 100+ personalized outreach emails/session with ~95% delivery success through automated workflows and structured personalization pipelines
- Integrated lead enrichment, segmentation, personalization, tracking, and response monitoring systems to support scalable GTM execution
- Developed workflow automation pipelines for outreach sequencing, engagement tracking, and operational reporting using APIs, n8n, and structured datasets

Technical Skills & Core Competencies

Programming: Python, JavaScript, SQL

AI & Automation: n8n, ChatGPT, Claude, Gemini, Workflow Automation, Prompt Engineering

Libraries & Packages: pandas, numpy, requests, beautifulsoup4, openpyxl, re, playwright

Technical Tools: Excel, Google Sheets, Data Validation, Git/GitHub

Core Competencies: AI Automation Systems, GTM Workflow Automation, CRM & Outreach Operations, Lead Enrichment & Segmentation

Education

BACHELORS OF COMPUTER APPLICATION (H) | 2022-25

Techno India University | Kolkata, West Bengal

GPA: 8.6 / 10

HIGHER SECONDARY | 2020–22

St. Joseph's College | Kolkata, West Bengal

PERCENTAGE: 89%
